

1 **Name of Study: Contraception Induced Menstrual Changes**

2 **Study component: Focus Group Discussion, Females**

3 **FGD ID#: CIMC 104**

4 **Date of FGD: 14 February 2025**

5 **Time FGD Began: 11:03**

6 **Time FGD Ended: 12:40**

7 **Name of Facilitator: [redacted]**

8 **Name of Note taker 1: [redacted]**

9 **Name of Note taker 2: [redacted]**

10 **Location of FGD: Wits MRU board room**

11 **Name of Transcriber: [redacted]**

12 **Name of Translator: [redacted]**

13 **Name (s) of Reviewer (s): [redacted]**

14 **Observers: [redacted]**

15

16 ***CONTEXTUAL INFORMATION***

- 17
 - *This was an FGD with women between the ages 18-49 years.*
 - *The interview was conducted in a private interview room.*
 - *The participants were relaxed, laughing, responsive, and willing to share their perceptions and experiences. However, participant number 6 seemed a bit distracted during the focus group discussion and left during the Quest view questions.*
 - *There were 6 females in total.*

22

23 ***VERBATIM TRANSCRIPT***

24

25 **F: Today's date is the 14 February 2025, time is 11h03, focus group C104. Thank you so much**
26 **for joining us today in our discussion. We will start our discussion; I would like for us to be a bit**
27 **creative and loosen up a bit. So, we will play a game briefly. I would like for you to tell me what**
28 **animal do you most relate to, and why did you select this animal? So, I will start so that you can**
29 **get an example. So, I see myself as a tiger. The reason for that is because – isn't we know how is**
30 **a tiger? It has stripes. So, stripes make it unique. So, I believe that I am unique, and I am happy**
31 **about that. And then a tiger hunts, if we take note of a tiger, it can go outside and get what it**
32 **wants and get it. And it usually goes alone and doesn't go with a crowd. So, I am also that type of**
33 **a person. I am a person who goes after what they want and gets it in every possible way. So, yeah.**
34 **That's me.**

35 [Participant raised her hand]

36

37 **F: Yes, number 5.**

38 P5: If I were to choose to be an animal, would have been Poly [Meaning: Poly is a bird]. I am not sure
39 if you know Poly, the bird//

40 **F: //Mhm [Neutral]//**

41 P5: //The smart one.

42 **F: Yes.**

43 P5: One thing I like about it is that it has a lot of colors, I love colors and what I have noticed about it
44 is that I think it is clever to the point that I don't know if it speaks or what it does, but it is smart. And I
45 am a kindhearted person, I don't like fighting with people most of the time. You will always find me
46 humble in every possible way. So, I would be Poly.

47 **F: You said what is Poly?**

48 P5: It is smart.

49 **F: What is it, is it a bird?**

50 P5: Yeah, it's a bird.

51 [Participant raised her hand]

52 **F: Oh okay. Thank you so much, number 5. Number 4.**

53 P4: Oh, if I were to choose an animal that I relate to, I would choose a lion [participant speaking softly].

54 **F: You would choose?**

55 P4: A lion.

56 **F: A lion.**

57 P4: Yes, a lion. Other animals treat it as a king. So, I also love to be treated as – that royal treatment. I
58 love it.

59 **F: Okay...**

60 P4: Yes.

61 [Participant raised her hand]

62 **F: Alright, thank you so much, number 4. Yes, number 1.**

63 P1: I would like to be a cat.

64 **F: Mhm [Neutral].**

65 P1: Yes, because I love to be loved. A cat loves being taken care of; I am also a person like that. Where
66 I am at, I like laughter and it must be nice, there mustn't be any quarrels and so forth.

67 **F: Mhm [Neutral].**

68
69 [Participant raised her hand]

70
71 **F: Okay, thank you, number 1. Number 3.**

72

73 P3: I love being a pigeon.

74

75 **F: Mhm [Neutral].**

76

77 P3: Because a pigeon is loving. I also love being loved.

78

79 **F: Mhm [Neutral].**

80

81 P3: And wherever you find it, it is always with its partner.
82
83 [Chuckles by participants]
84
85 P3: [Chuckles] So, I also like walking around with my partner everywhere I go and support me in
86 everything.
87
88 **F: Mhm [Neutral].**
89
90 P3: Yeah. That's it, thank you.
91
92 [Participant raised her hand]
93
94 **F: Thank you, number 3. Number 6.**
95
96 P6: I would like to be a dog.
97
98 [Chuckles by participants]
99
100 **F: Okay...**
101
102 P6: I would like to be a dog because I like protecting people that I love. A dog is an animal that protects,
103 even if it is in the yard at home, we know that we are safe because there is a dog outside [the house].
104
105 **F: Mhm [Neutral].**
106
107 P6: And a dog likes being touched. And I also love that. If I am next to a person, I feel like touching
108 them or have them touch me.
109
110 **F: Okay...**
111
112 P6: So, yeah.
113
114 **F: Okay, thank you, number 6.**
115
116 [Participants raised her hand]
117
118 **F: Yes, number 2.**
119
120 P2: I like being an eagle.
121
122 **F: An eagle...**
123
124 P2: Yes, because I like seeing my life rising like an eagle, you see [participant is soft spoken and shy].
125
126 **F: Yes, okay. Thank you, number 2. I would like to ask that before we continue with our**
127 **discussion, we raise our voices just like how I am raising my voice so that it is easy for you to be**
128 **audible and for us to understand each other as we continue with our discussion. So, now for the**
129 **rest of our discussion today, we will talk about menstrual cycles or our menstrual periods. So,**
130 **sometimes women or girls use different words when talking about menstrual cycles or the days**
131 **of the month when they are bleeding. What are some of the words you use for explaining**
132 **menstrual cycle.**
133
134 [Participants raised their hands]

135
136 **F: Yes, number 3. I have noted you, number 4 and number 5.**
137
138 P3: **NgiyeJapan** [Meaning: It is a Zulu slang word with a direct translation, “I have gone to Japan”].
139
140 **F: NgiyeJapan** [Meaning: It is a Zulu slang word with a direct translation, “I have gone to
141 **Japan”].**
142
143 P3: Yes.
144
145 **F: Okay, what does that mean?**
146
147 P3: It is a respectful word for being on [menstrual] periods for males to not understand. It is our language
148 as women//
149
150 **F: //Mhm//**
151
152 P3: //We use Japan, Japan has a flag that has a red circle.
153
154 **F: Okay...**
155
156 P3: It shows that a woman at that time is bleeding [Meaning: participant referring to menstrual
157 bleeding].
158
159 **F: It is bleeding...**
160
161 P3: Yes.
162
163 **F: Okay. Thank you, number 3.**
164
165 [Participant raised her hand]
166
167 P4: Oh, sometimes say that “*the robot is red*”.
168
169 **F: The robot is red.**
170
171 P4: Yes...
172
173 **F: Okay...**
174
175 P4: So, it is our language as women when talking, to hide it from the men, we say “*the robot is red*”.
176
177 **F: Okay, why do you relate [menstrual] bleeding with “*the robot is red*”?**
178
179 P4: It is because when “*the robot is red*” you can’t cross the road.
180
181 **F: Mhm [Neutral].**
182
183 P4: Yes. So, with [menstrual] periods, you can’t have sex.
184
185 **F: Oh okay... Thank you, number 4. Number 5.**
186
187 P5: It was going to be Japan due to its flag//
188

189 F: Yes...[Neutral].
190
191 P5: Because that is the word we use a lot nowadays that **umuntu uye eJapan** [Meaning: It is a Zulu
192 slang word with a direct translation, “A person has gone to Japan”].
193
194 **F: Mhm [Neutral].**
195
196 P5: Yeah. So, Japan.
197
198 **F: Your explanation is the same as number 3 as to why you say it is Japan?**
199
200 P5: Mhm [Yes].
201
202 **F: Alright, okay thank you so much. Are there different words that you have heard of from other**
203 **people that they use to explain menstrual cycle?**
204
205 [Slight silence by participants]
206
207 **F: Apart from the ones that you have mentioned.**
208
209 P4: Please repeat the question.
210
211 **F: Okay, are there other words used to explain menstrual cycle. Isn't we know that there is a**
212 **difference between menstrual period and a menstrual cycle. [Menstrual] cycle is the whole month,**
213 **how your cycle is structured. And then there are menstrual periods, that is when you are bleeding.**
214 **Are there different words that explain that?**
215
216 P4: No, it is cycle. It is only [menstrual] cycle.
217
218 **F: Oh, the [menstrual] cycle you call it a menstrual cycle.**
219
220 P4: Yes.
221
222 **F: Okay... Alright, that you so much. Women or girls, how do they usually track when they are**
223 **about to go on their menstrual period?**
224
225 [Participants raised their hands]
226
227 **F: Yes, number 4. I have noted you, number 5, number 3 and number 1.**
228
229 P4: So, most of the time women when they are about to go on their menstrual periods, they don't usually
230 go [on menstrual periods] the same time. Let's say maybe you go on the 15th and then go the following
231 month on the 15th, that doesn't usually happen. So, they track by, “my breasts are sore today, you see.
232 I have a pimple, like my breasts are big today, you see”//
233
234 **F: //Mhm [Neutral]//**
235
236 P4: //So, that is how we track.
237
238 **F: Mhm [Neutral].**
239
240 P4: Others track that this side [Meaning: Participant is pointing to one side of her bladder], I don't know
241 what it is called. It becomes painful when you are about to go on menstrual periods, you feel pain here
242 [Meaning: Participant is pointing to the left and right side of her bladder].

243
244
245
246
247
248
249
250

292
293
294
295
296

F: Where are you pointing to?

P4: Here on the sides.

F: On the bladder?

P4: Yes, but it is painful this side [left] and this side [right]. Not the whole bladder.

F: Oh, on the left and the right of the bladder.

P4: Yes.

F: Alright. Okay, thank you, number 4. Number 5.

P5: If I am going to go on [menstrual] periods, the bladder becomes bloated. Then I have a runny tummy, that is when I know that yes, anytime from now – oh and my mood changes, even if when I wake up in the morning, I will wake up not in the mood of being hyper today. But I will wake up moderate, like I could frown the whole day. I can then feel that yes, I am approaching my [menstruation] days.

F: Okay... Number 1.

P1: When I am about to go on [menstrual] periods, I can feel my breasts sore. And if you are going to go on [menstrual] periods, your vagina becomes – I don't know how to explain how it becomes – it becomes loose, it doesn't become tight. It has that thing you see//

F: //Mhm [Neutral].//

P1: //You see, it [vagina] doesn't become tight, it becomes loose. That is when you know that something is coming [Meaning: Participant is referring to menstrual periods] and maybe have pimples. Then maybe one [pimple] will be painful. Others start off by having period pains before their [menstrual] period days. Just like me, I have 3 days where I will have period pains but then again not on [menstrual] periods.

F: Okay, thank you so much, number 1. Okay, so, thank you so much for your responses. Maybe what we are looking at now that I would like for us to look at when talking about tracking, uhm are there other people that you have heard of, that there are things that they use to track if they are going to be on their [menstrual] periods? An example, is an alarm maybe or there is an app that they are using or a calendar?

[Participants raised her hands]

F: Yes, number 5 and then number 4.

P5: Yeah, there is this app called **Flow** if I am not mistaken. If you don't know of **Flow**, you insert when your [menstruation] days start. If you go 5 days on [menstrual] periods, it will count the 5 days in that month and it will then tell you when you will go on your [menstrual] periods again during the month. So, it is called a **Flow**. A period flow.

F: Oh okay. So, period **Flow is period and then it is **F-I-o-w**//**

P5: It is **Flow**, you will type **Flow** and then you will put your dates [Meaning: Participant is referring to the dates that you go on menstrual periods on]. Then for the following months it will count for you, if

CIMC 104 English 14 February 2025

Final Version 1.0

Page 6 of 40

297 your cycle will happen after 28 days or after 35 days if I am not mistaken. Then it will keep doing that
298 for you. Even if there are changes, it will tell you that there are changes now.

299

300 **F: Mhm [Neutral].**

301

302 P5: Mhm [Yes].

303

304 **F: Okay, thank you, number 5 for that interesting information. Yes, number 4.**

305

306 P4: Oh, I was going to talk about the same thing as number 5.

307

308 **F: Mhm [Neutral].**

309

310 P4: There is a friend of mine who uses this app. It tells you if you are late or if you are late for your
311 [menstrual] periods, it tells you that you are late. You are supposed to be on your [menstrual] periods.

312

313 **F: Mhm [Neutral].**

314

315 P4: Yes.

316

317 **F: Okay, thank you so much. So, we all have the same understanding for the rest of our discussion,**
318 **when talking about menstrual cycle, we are talking about the monthly cycles women usually have.**
319 **So, this includes the days of the month when you are bleeding, the time just before you bleed, the**
320 **time just after bleeding, and other times of the month in between. I hope that we all understand.**

321

322 Mhm [Yes] [Response by participants]

323

324 **F: Another thing that I would like to emphasize on is that there are words that I asked you about**
325 **that you usually use when explaining about going on menstrual periods, if you are comfortable,**
326 **you can use those words when continuing with our discussion because they are words that you**
327 **usually use.**

328

329 Mhm [Yes] [Response by participants]

330

331 **F: We will move on to the following question in our discussion. I would like for us to think about**
332 **how your own menstrual cycles have changed while using contraceptive, it can be changes that**
333 **you have liked and changes that you have not liked. There are questions that I will ask you which**
334 **is about this. Okay, so, first, please tell me about any ways contraception has changed how often**
335 **you have bleeding. So, here we are looking at bleeding that comes more often or less often, before**
336 **using contraception. Do we all understand?**

337

338 Yes! [Participants agreeing]

339

340 [Participant raised her hand]

341

342 **F: Okay. Yes number 4, number 3, number 1, number 2, number 6, yes number 4.**

343

344 P4: Alright, before I used contraception, my [menstrual] periods were for 3 days. They were normal
345 and alright.

346

347 **F: Mhm [Neutral].**

348

349 P4: So, after using contraception it happened that I spotted after [menstrual] periods. There was blood
350 that was coming out a little. Like it was a brown discharge before [menstrual] periods. That brown

351 discharge would take 3 days and another 3 days will be [menstrual] periods. And this happens –
352 [menstrual] periods – I go twice a month. In January I went twice [on menstrual periods] at the
353 beginning and at the end of the month. Another thing, I have [blood] clots, you see//

354

355 **F: //Mhm [Neutral]//**

356

357 P4: //That come out.

358

359 **F: Mhm [Neutral].**

360

361 P4: Yes...

362

363 **F: Okay...**

364

365 P3: My [menstrual] periods changed, like before I used contraception, they were normal. I would go
366 [on menstrual periods] 5 days.

367

368 **F: Mhm [Neutral].**

369

370 P3: Then when I had started to use contraception, I bleed heavily. Maybe it was 14 days, and I would
371 come out blood clots. It would be sore on the bladder. So, when I had finished the following month, I
372 didn't go [on menstrual periods] at all.

373

374 **F: Okay. So, your [menstrual] periods, there was a time where they stopped and then continued?**

375

376 P3: Yes.

377

378 **F: Okay. Alright, yes number 1.**

379

380 P1: I encountered a lot of problems when I was getting the injection. I use the implant; it has been a
381 year since I have had. I have used it before, it treated me well before. I am an individual that doesn't
382 have a lot of blood. So, initially when I had inserted it [implant], I would go for 3 days [on menstrual
383 periods] well as usual. But now I took it [implant] out and inserted another one, it has been a year now.
384 I have inserted it and completed a year in January but now there are a lot of changes and in a bad way.
385 Because I experienced bleeding in such a way that I don't understand. I even thought that maybe I have
386 a miscarriage because there were a lot of blood clots. I know that if I am urinating when on [menstrual]
387 periods, I am not a person that urinates, and it shows that I am on [menstrual] periods. My urine didn't
388 show that I am on [menstrual] periods. But now when I am urinating, my urine shows that I am on
389 [menstrual] periods, they don't stop. I go to the clinic, and they give me those pills to treat it, it becomes
390 better for a while when I am taking the pills. After that it starts again. So, yeah that is the problem that
391 I have encountered, and I can see that I will end up losing my male partner because I am always on
392 [menstrual] periods.

393

394 **F: Okay, so, before you used the contraception method that you use, you were never on your
395 [menstrual] periods frequently.**

396

397 P1: No, I didn't go frequently on them [menstrual periods], I would go 2 days 3 days and that's it. But
398 now it is too much.

399

400 **F: Okay, thank you so much, number 1. Number 2.**

401

402 P2: Since I have started using the injection, I don't go on [menstrual] periods. But there is always a
403 discharge, I can't not bath. It [discharge] is brown. Now that is what I am facing. Now I can't do things.
404 [Chuckles by participant, she is shy]

F: What are the things that you can't do?

P2: Playful things.

F: Okay, when you are saying playful things, what are you referring to?

P2: Playing as adults.

[Chuckles by participants]

F: What is playing as adults?

P1: You can't have sex [participant is whispering].

F: Yes, number 1.

P1: I think she means she can't have sex because she is embarrassed//

P2: //Yes, because now even when I am doing it [sex], bleeding becomes worse. So, that's why.

[Participant is shy and seems uncomfortable]

F: Okay, thank you, number 2. Okay, so, we will continue with our next question. Please tell me about any ways contraception has changed how regularly you have bleeding. How regularly you bleed.

[Participant raised her hand]

P4: I have mentioned that I go [on menstrual periods] twice a month since I started contraception. So, before I was on contraception I would go [on menstrual periods] once. Since I am on contraception I go twice and my days [of menstrual periods] are increasing. They are no longer 3, they are 6.

F: Okay...

P4: Yes...

F: So, number 4, do you find it easier or harder to know when you will start bleeding?

P4: Easier.

F: It is easier now to tell.

P4: Yeah.

F: Prior, was it hard to tell?

P4: It was hard because I would just see myself bleeding. I would just see the blood. But when I started to be on contraception, I would then start off with the brown discharge. I know that after 3 days I will go on [menstrual] periods.

F: Oh okay...

P4: Yes.

459
460 **F: So, your bleeding is more regular now?**

461
462 P4: Yes.

463
464 **F: Alright, thank you so much, number 4. Number 3.**

465
466 P3: As I had mentioned that I don't go [on menstrual periods] at all, on [menstrual] periods. So, that
467 worries me, that I can see other woman go on [menstrual] periods, yet I don't go [on menstrual periods].
468 I ask myself that this blood, where does it go. So, what I do is that I go and donate [blood] to make sure
469 that this blood comes out because blood must come out of a woman. It is nature that it [blood] must
470 come out each and every month. So, since I don't go [on menstrual periods] I ask myself where the
471 blood in body goes because it must come out.

472
473 **F: Okay...**

474
475 P3: So, I end up going to donate [blood], maybe the blood will be right I don't know if I am doing the
476 right thing or wrong thing.

477
478 **F: Would you say before you used contraception it was easier or was it hard for you to see if you**
479 **are about to start. Were your [menstrual] periods regular or they were not regular?**

480
481 P3: Yeah, it was just easy.

482
483 **F: Oh, they were regular.**

484
485 P3: Yes.

486
487 **F: Alright. Now they [menstrual periods] have stopped?**

488
489 P3: They have stopped, ever since I started [contraception], they [menstrual periods] have stopped.

490
491 **F: Okay. Thank you so much, number 3. We will move on to our next question, please tell me**
492 **about any ways contraception has changed how long you have bleeding. [Slight silence by**
493 **participants] Maybe an example, if you are bleeding, how many days do you bleed compared to**
494 **before you started using contraception.**

495
496 [Participants raised their hands]

497
498 **F: Yes, number 5, number 1 and number 6.**

499
500 P5: Before I used the injection for preventing, I would go for 5 normal days and was able to count my
501 days. But after the injection, I go [on menstrual periods] for 14 days as it is. Worse part, now I can't tell
502 if I am about to go [on menstrual periods] now. I will notice when I have started [menstrual periods]
503 and urinating and say, "oh my goodness"! You see. I don't usually feel it if I am about to go on
504 [menstrual] periods. It has really affected me a lot.

505
506 **F: Okay... Yes, number 1.**

507
508 P1: The injection has also changed my [menstrual] periods. I don't know when I go [on menstrual
509 periods] and how. I just see them [menstrual periods]. I used to go menstrual periods for 3 days but
510 when I started getting the injection I went for 5 days. But now I can say it is more than 5 days. I can say
511 it is 2 weeks. I only stop once I drink the pills that they gave me. Once they flush out of the body, I start
512 all over again.

F: Mhm [Neutral].

P1: For me to stop my [menstrual] periods I must drink pills. For me to stop [menstrual periods]. So, while I have pills in my body, that is when I get to rest during [menstrual] periods. But once they get finished or I discontinue those pills, I start all over again.

F: Okay, thank you, number 1. Which pills are you talking about?

P1: I don't know their name, the pills, but it is the small white pills that I was given at the clinic. They for stopping the blood.

F: Okay, alright. Thank you so much. Number 6.

P6: When I started the injection, it disturbed the days that I go on [menstrual] periods. Before the injection I would go [on menstrual periods] for 7 days. Now since I am getting injected, I go whenever on [menstrual] periods. In a month I go twice. I only see when I notice the blood. You will find that I am sitting like this, when I stand up there is blood. I don't have menstrual cramps, I have nothing. I just see the blood, maybe it is for 3 days bleeding. It stops and then it starts again. I don't know when I start [menstrual periods]. It sometimes happens that a month will finish, and I haven't gone on [menstrual] periods. Then the following month, maybe I go twice [on menstrual periods]. Maybe I go on menstrual periods 3 days, 5 days, the days are not the same length.

F: Oh okay. So, after you had started to use the contraception, you couldn't tell how many days exactly do you go on menstrual periods?

P6: Yes. I can't tell.

F: So, it is between//

P6: //It can be 3 days//

F: //Mhm [Neutral]//

P6: //It can also be 5 days. And I bleed a lot. I have also used the pills to stop menstrual blood flow. I ended up noticing that they are not right because it stops menstrual blood flow at that time particular time when you have taken it. And you will take it [pill] today, you are bleeding a lot, it won't discontinue the menstrual blood flow today. It will discontinue it tomorrow, maybe for 1 day. The following day it starts again. So, it is better to let the [menstruation] blood to come out itself until it stops on its own.

F: Okay, the pills that you mentioned are the ones that were described by number 1?

P6: Yes.

F: They are also white and small?

P6: Yes, they are white. They are with the ones for contraception [Meaning: participant meant that the white contraceptive pills are taken from the contraceptive pills pack which consists of other pills which are different colors] , the ones for contraception includes the red, yellow and white ones. So, they cut them and give us only the white ones.

F: The white ones only...

P6: Yes.

F: Alright, thank you so much, number 6. Is there anyone else that would like to share?

[Slight silence by participants]

F: Okay, we will move forward to the questions that follow. When you have bleeding, how does contraception change how much you bleed during those days? Maybe do you have more bleeding or less bleeding since you started using the contraceptive method.

[Participant raised her hand]

F: Yes, number 4.

P4: Before I started contraception, I would bleed in the afternoon until the night, it would be the same [Meaning: Participant meant the volume of the blood that she was bleeding was the same].

F: Mhm [Neutral].

P4: So, since I am on contraception now, in the afternoon the blood comes out a little bit.

F: Mhm [Neutral].

P4: Drops, drops come out. At night, it becomes something that I don't know.

F: How is it at night?

P4: I can change [sanitary] pads 3 times at night. They fill up quickly. There are blood clots.

F: Oh, you bleed heavily...

P4: I bleed heavily, and there are blood clots inside.

F: Oh okay//

P4: //Yes.

F: Then before you used contraception it was well, when you say it was well, how did you bleed? Were you bleeding heavily, moderate or it was light?

P4: It was moderate.

F: Oh okay...

P4: Yes, it was normal, moderate.

F: Oh okay... Thank you so much, number 4. Number 1.

P1: My [menstrual] periods before I was on contraception, they were right. I wasn't even using a [sanitary] pad, I used tampons. Even before using a tampon, I used a pantyliner because I am not a person with a lot of blood. But now, it happens that I insert a tampon and a [sanitary] pad, both of it because when it [menstrual blood] comes, it comes heavily. And it does happen that if in the afternoon it [menstrual blood] is not there, at night it will be there. I would assume that I am done [with menstrual periods] yet no, at night it [menstrual blood] comes back. Or if it is not there at night, in the morning it will come back.

F: Mhm [Neutral].

P1: It is something like that and it has made a lot of changes...

F: Mhm [Neutral], okay. Thank you, number 1. Is there anyone else that would like to share?

[Slight silence by participants].

F: Okay, we will move on to the next question. What about how your bleeding looks? When we are talking about how your bleeding looks, we are talking about the color of your blood. Since you are using your contraception, what color is your blood? Is there a difference between the color it was before and after using contraception? And are there any blood clots that you noticed before and after. Those are the things we are looking at.

[Participants raised their hands]

F: Yes, number 2, 4, 5 and 1.

P2: I can see a difference because before it was red. Now when I am on my [menstrual] periods it looks like it is dark, it is black, and it has blood clots that are black. It [menstrual blood] is not red, it is not like before.

F: Okay. Thank you so much, number 2. Number 4.

P4: I can say that the difference – okay before I had blood that was red, the red that is normal. When I was on contraception, my blood is brownish, it is strong and includes blood clots.

F: Mhm [Neutral].

P4: Yes.

F: Okay...Number 5.

P5: Before, it was normal. The blood was red, but after I was on contraception, it became brown. I didn't understand it, it wasn't the red – the normal red that came out at first. It just changes and it [menstrual blood] smells ugly. Because even the smell of it [menstrual blood] differs. The other one was smelling well, it showed that I am on moderate periods. Even when I was bathing, you could tell that it is [menstrual] blood. Now when I bath, it is like I am bathing something that smells bad. It has changed a lot, shame.

F: And the blood clots//

P5: //Mhm [Yes], they were also coming out. They were coming out before but moderate but now they come out brown, they smell and all of that. So, yeah.

F: Okay, now the blood clots come out heavily or they come out the way they came out previously.

P5: When I start [menstrual] periods, since I am on contraception, it [menstrual blood] comes out a lot. And then it [menstrual blood] becomes less until I insert a pantyliner. Once I insert a pantyliner it [menstrual blood] becomes worse. You end up not knowing whether you insert a pad or a pantyliner because you assume that it [menstrual blood] is getting less yet it is not less.

F: Okay, thank you so much, number 5. Number 1.

675
676 P1: Mine have also changed. I have never had blood clots before, it [menstrual blood] would be red and
677 normal but now I have blood clots that make me ask myself what is happening. I even think that maybe
678 there is meat [Meaning: participant is referring to muscle] that is coming out of me. But it is not the
679 same and blood is black. It is black, it is not the usual [color of menstrual] blood.
680

681 **F: Okay, thank you so much, number 1. Thank you for sharing your experiences. There is**
682 **something that I would like for us to talk about. Do you know of the discharge that is – I don't**
683 **know how one can explain it – maybe you can describe it to me but there is this discharge that**
684 **comes out of the vagina apart from blood. It is not blood, can you explain to me what is that**
685 **discharge, how it looks, have any of you noticed that discharge?**
686

687 Yes! [Participants agreeing]

688
689 [Participant raised her hand]

690
691 **F: Yes, number 4.**

692
693 P4: I would describe as it is very white.
694

695 **F: Oh, it is white?**

696
697 P4: Mhm [Yes] and it is jelly like. It is not weak, you see.
698

699 **F: Mhm [Neutral].**

700
701 P4: If you look at it carefully, it is white. What can I call that thing. [Participant thinking] What can I
702 call it... [Participant thinking] There are white things on it, very white. It [discharge] is very different
703 inside.
704

705 **F: Okay...Does it come out during your [menstrual] periods, do you see it during your**
706 **[menstrual] periods or, when do you see it?**

707
708 P4: I see it before.
709

710 **F: Before [menstrual] periods...**

711
712 P4: Yes...
713

714 **F: Before you start [menstrual] periods.**

715
716 P4: Before I start [menstrual] periods, yes...
717

718 **F: Alright, number 4 thank you. Is there anyone else that would like to share?**

719
720 [Slight silence by participants]

721
722 **F: Others have not noticed any fluid.**

723
724 [Slight silence by participants]

725
726
727 **F: It can be even during [menstrual] periods, besides the blood.**
728

729 [Slight silence by participants]

730

731 **F: Okay, can you please tell me how contraception has changed your menstrual cramps? Have**
732 **your menstrual cramps gotten better or worse with contraception?**

733

734 [Participants raised their hands]

735

736 **F: Yes, number 2. I have noted you, number 1 and number 4.**

737

738 P2: Mine got better because I experienced **islumo** [Meaning: It is a Zulu word that is directly translated
739 as menstrual cramps] when I went on my [menstrual] periods. Now it is better. Since I don't go on
740 [menstrual] periods, I can feel that there is some pain, it is small pain. It is not like before.

741

742 **F: What is *islumo*?**

743

744 P2: It is period pains.

745

746 **F: Oh, it is period cramps.**

747

748 P2: Yes.

749

750 **F: Oh okay. Thank you so much, number 2. Number 1.**

751

752 P1: Mine has changed a lot I can't feel them [menstrual cramps] anymore. Since I started contraception,
753 I don't have them anymore, yet I used to have them 3 days before I went on [menstrual] periods. So
754 now I don't have period pains anymore.

755

756 **F: Oh okay, thank you so much. Number 4.**

757

758 P4: I also want to add to what the ladies have said. I used to have period pains that were painful, that
759 included vomiting. So, ever since I started contraception, I am alright. I go on my [menstrual] periods
760 without pains.

761

762 **F: Alright, thank you so much, number 4. Are we still good though?**

763

764 Yes! [All participants agreed at once]

765

766 **F: Okay. So, while you have been sharing your experiences, our notetaker [Notetaker name] was**
767 **writing on the cards to help remind us of what we were talking about. Please can we review what**
768 **we have said so far. We will start off by looking that side, please can we turn and look at the cards.**
769 **So, we spoke about how often you bleed. There were some who said less often than before, and**
770 **others said more often than before. Is there anything that we left out that we can add?**

771

772 Mhm! [No] [All participants responded]

773

774 **F: Okay. Then we looked at how regularly you bleed. Others said they experience more bleeding.**
775 **Others said unpredictable bleeding. Others said regular or predictable bleeding. Other said**
776 **irregular bleeding or unpredictable. Is everything right?**

777

778 Yes! [All participants responded]

779

780 **F: We looked at how long you bleed. Others said 3-5 days. Others said 6 days. Others said 14**
781 **days. Is everything right?**

782

783 Yes! [All participants responded]

784

785 **F: We looked at how much you bleed. Others said heavy bleeding. Others said clots. Others said**
786 **spotting. Is everything right?**

787

788 Yes! [All participants responded]

789

790 **F: How your blood looks. Others said dark red, almost black. Brownish color, it smells bad.**
791 **Others said has a black dark color. Is everything right?**

792

793 Yes! [All participants responded]

794

795 **F: Is there anything that we would like to add?**

796

797 No! [All participants responded]

798

799 **F: Okay. Then we looked at menstrual cramps. Others said cramps got better, no pains. Is there**
800 **anything else that we would like to add?**

801

802 [Slight silence by participants, meaning there is nothing that they would like to add]

803

804 **F: Are there any other ways contraception has changed your menstrual cycle that we have not**
805 **talked about yet?**

806

807 Mhm [No] [All participants responded]

808

809 **F: Okay, can we please look this side. So, are there any of you that can share any delays that you**
810 **had in your [menstrual] period, after discontinuing contraception? Someone did share between**
811 **us but are there others who would like to share, if there are any of you who had delays after**
812 **discontinuing contraception. When I say delays, I mean I your [menstrual] periods get delayed.**

813

814 [Slight silence by participants, meaning there is nothing that they would like to add]

815

816 **F: Alright, thank you so much. So, we have looked at all the changes that we have in our menstrual**
817 **cycles that make us have changes because of the contraception that we use. We will now look at**
818 **how have all these changes to your menstrual cycle made your body feel?**

819

820 [Participant raised her hand]

821

822 **F: Yes, number 6. Number 5 and number 3 I have noted you. And number 4.**

823

824 P6: The change that I had with regards to starting to prevent [Meaning: To prevent means to use
825 contraception]. Please repeat the question.

826

827 **F: Okay, the question says all the changes that you had, how did they make your body feel?**

828

829 P6: Okay. The change that I have is that I am losing weight.

830

831 **F: Mhm [Neutral].**

832

833 P6: Since I have started the injection, since I don't know when I go on my [menstrual] periods. It now
834 happens that I go twice in a month.

835

836 **F: Mhm [Neutral].**

P6: That makes me lose weight on my body, because I bleed a lot. I am a heavy bleeder; my blood comes out heavily. So, that makes me unsure about my body scale because I lose weight. If I haven't been on my [menstrual] periods or went on [menstrual] periods and blood didn't come out heavily, I become alright and can that my body is still in a right condition. But if I am going to keep on being on [menstrual] periods, I lose weight on my body.

F: Okay. So, apart from losing weight, was there changes in terms of your energy or your emotions or it is just losing weight only?

P6: No, it is just losing weight only.

F: Thank you so much, number 6. Number 3.

P3: Since I have mentioned that I no longer go on [menstrual] periods at all//

F: // Mhm//

P3: // I have gained a lot of weight. Number 2, I no longer have the energy to yearn for – I am not sure if it is part of what we are talking about. Can I mention it?

F: Yes, you may mention it.

P3: [Chuckles by participant, the participant seems shy]

F: No, relax...

P3: When we make ourselves happy with my partner, I no longer yearn to- you see//

F: // When you say when you make each other happy, what does it mean when you say when you make each other happy?

P3: Like when we are together... You see... I don't have those feelings of wanting to have sex. I don't have the interest, ever since I started [contraception], my feelings for having sex are not the same as before. Before it was right, everything was normal. Since I have inserted the injection, I don't crave for anything.

F: So, you can say it affected your emotions.

P3: Yes. They have changed a lot.

F: Is that a good thing or a bad thing that you no longer have interest//

P3: //I think it is a bad thing.

F: It is a bad thing?

P3: Yeah.

F: Why?

P3: My goodness! This thing is nature, we must... [Chuckles by participant].

F: What must happen?

CIMC 104 English 14 February 2025

Final Version 1.0

Page 17 of 40

891
892 P3: We must do it.
893
894 **F: Do what?**
895
896 P4: Sex [Participant whispering].
897
898 P3: [Chuckles by participant] Make ourselves happy.
899
900 P5: Sex [Participant whispering, chuckles by participant].
901
902 **F: Relax, you can say the word, what do you do?**
903
904 P3: [Chuckles by participant]
905
906 **F: Don't be afraid, we all do this thing.**
907
908 P3: Yes, that thing!
909
910 [Chuckles by participants]
911
912 **F: What is that thing?**
913
914 P3: The one you are implying.
915
916 **F: Okay, so you are saying sex.**
917
918 P3: Yes.
919
920 **F: Alright, I hear you. Thank you so much, number 3 for sharing.**
921
922 [Chuckles by participants]
923
924 [Participants raised their hands]
925
926 **F: Number 4 and number 1.**
927
928 P4: I would say what has changed on my body, since I go twice [on menstrual periods] a month I lose
929 weight. Secondly, my body gets tired.
930
931 **F: Your body gets tired?**
932
933 P4: Mhm [Yes].
934
935 **F: Okay...**
936
937 P4: Sometimes I wake up and feel like I could sleep again. My body is tired.
938
939 **F: Okay, how does it make you feel that you have lost weight?**
940
941 P4: It makes me happy because it is what I want.
942
943 **F: Oh, you are happy about that.**
944

945 P4: Yes.

946

947 **F: Okay...Thank you so much, number 4. Number 1.**

948

949 P1: I am always tired...I am always tired. I have lost weight, there are kilos that I have lost. I don't like
950 that; I like my body that I knew [Meaning: Participant means she loves her previous body weight]. And
951 I no longer have emotions when we are having sex, I no longer can touch him first. It must be him, and
952 even then, it will take time because even when he holds me, there is nothing that attracts me. So, I end
953 up doing it [participant referring to having sex] just for him. Which is wrong. I have even gone to the
954 clinic before, and they told me what to do but that didn't help me.

955

956 **F: Mmh [Neutral].**

957

958 P1: It doesn't help me. In fact, this injection that I am using is not working for me because it has changed
959 my life a lot.

960

961 **F: How does that make you feel?**

962

963 P1: It makes me very sad, because all the changes that it has made, it is changes that are not right. It is
964 changes that I don't agree with. It is changes that I don't agree with, that make everything of mine
965 difficult.

966

967 **F: Okay...Thank you. Thank you for sharing your experiences, even the sensitive ones. Thank
968 you so much. All these menstrual changes, how did they impact your day-to-day life?**

969

970 [Participants raised their hands]

971

972 **F: Yes, number 5. Number 4 and number 3 I have noted you.**

973

974 P3: Please repeat the question.

975

976 **F: Okay, the question is, how have all these menstrual changes impacted your day-to-day life? So,
977 when we are talking about this, we are referring to your personal life, your workplace, at home,
978 others have mentioned that in their relationships they are affected. So, we are looking at all of
979 that. I am aware that our questions sound like they are a repetition, but maybe if there are any
980 of you that have not shared, please may they respond.**

981

982 [Participants raised their hands]

983

984 **F: Yes number 5, and number 4.**

985

986 P5: The injection made me gain [weight], that is the first thing. Two, gaining has affected my self-
987 esteem and confidence. There are clothes that I can no longer wear. For instance, tight clothes, I don't
988 like wearing them. I feel like they will show my body structure, or I first judge myself, you see.

989

990 **F: Mhm [Neutral].**

991

992 P5: So, it is not going well.

993

994 **F: Okay, so, all these things that you have mentioned are things that talk about your body, how
995 your body feels. I would like for you to let me know of changes that you had in terms of your day-
996 to-day life. Like how it has affected you, maybe at work or at home, the chores you do. Your
997 relationships...**

998

999 P5: I can say in my relationship...

1000

1001 **F: Okay...**

1002

1003 P5: I am also one of those people who no longer have interest in having sex.

1004

1005 **F: Mhm [Neutral].**

1006

1007 P5: Because I feel like since I have gained, even when a **woman on top** [Meaning: It is a phrase used to

1008 describe a sex position whereby the male partner lays down and faces up and female partner goes on

1009 top of him during sex.] is being done, I just say no, we would rather not do it. You see, because I don't

1010 have that confidence like before.

1011

1012 **F: Mhm [Neutral]. What is a woman on top?**

1013

1014 P5: [Chuckles] It is when your partner lays down and faces up and then you [woman] go on top of him

1015 during sex.

1016

1017 **F: Oh...you are the one who is on top of him.**

1018

1019 P5: Yeah.

1020

1021 **F: Oh okay, thank you so much, number 5. Number 4.**

1022

1023 P4: As I had mentioned, the injection makes me tired. I wake up from sleeping and sleep again. So, at

1024 work most of the time I work on the computer, you see. I sometimes feel like sleeping, I get sleepy

1025 while working because I am tired. I use things, I use energy drinks which are not good for my health,

1026 the energy drink.

1027

1028 **F: Mhm [Neutral].**

1029

1030 P4: Yes...

1031

1032 **F: Okay, thank you so much, number 4, number 3.**

1033

1034 P3: The problem I am facing. Since I had mentioned that I no longer yearn to have **tlof – tlof** [Meaning:

1035 It is a slang word that means sex] //

1036

1037 **F: // What is tlof – tlof?**

1038

1039 [Chuckles by participants]

1040

1041 **F: I don't know the word; can you explain what it means?**

1042

1043 P3: It is to have sex.

1044

1045 **F: Oh okay...**

1046

1047 P3: So, my partner has the tendency of thinking that I am cheating on him and stuff, because it is not

1048 like before because before it was just like, yeah.

1049

1050 **F: Mhm [Neutral].**

1051

1052 P3: P3: Yeah, so, now when we have sex, he can see that I am getting bored, you see because I no longer
1053 feel this thing [referring to sex]. Before I was very active [during sex] but now it is not going well.

1054

1055 **F: Alright, okay. Thank you so much. Thank you for sharing. We have a look again, since we**
1056 **were having our discussion, our note taker was writing down the things that we were discussing.**
1057 **So, we will have a look at them. Please may we turn and look at the things that we discussed.**

1058

1059 [Participants turned to look at the notes on the cards]

1060

1061 **F: So, we looked how changes make your body feel. Other said they lost weight. Others said they**
1062 **gained a lot of weight. Others said loss of sexual appetite. Others said body feels tired or gets**
1063 **tired. Others said self-esteem and self-confidence decreased. Is everything right?**

1064

1065 Yes! [All participants responded at once]

1066

1067 **F: Is there anything that we would like to add?**

1068

1069 No. [All participants responded at once]

1070

1071 **F: Okay, then we looked at how changes impact your daily life. Others said low sexual drive has**
1072 **created trust issues with partner. Others said always sleepy at work. Others said has affected her**
1073 **sexual relationship. Is there anything else that we would like to add?**

1074

1075 No. [All participants responded at once]

1076

1077 **F: Alright thank you so much. We can turn back to this side. How do we feel, are we good?**

1078

1079 Yes! [All participants responded at once]

1080

1081 **F: Alright, we can drink water if we would like to drink water.**

1082

1083 [Participants drinking water]

1084

1085 **F: Okay, let me give you a chance to drink water.**

1086

1087 [Movements of participants drinking water]

1088

1089 **F: Alright, so, we will now do an activity together so you can show us about your experiences with**
1090 **menstrual cramping and other pain that we experience when on menstrual periods. What we will**
1091 **do, we will give an individual a sticker and ask you to insert it on the poster anywhere on the**
1092 **body. So, if we turn, we will see that there is a body.**

1093

1094 [Participants turned at looked that the body mapping charts]

1095

1096 **F: On our left, we are looking at the front. And then on our right, we are looking at the back. So,**
1097 **it is one body, there is a front and a back. So, I will give you each a sticker where you will insert**
1098 **them. Whether you can insert them at the back or in front, it is up to you. You are allowed to use**
1099 **a sticker that is the same color but insert it in different places because we are discussing menstrual**
1100 **cramps that you have experienced and pain that you experience during your menstrual period.**
1101 **Do we all understand?**

1102

1103 Yes! [All participants responded at once]

1104

1105 **F: So, we will start, please can we have everyone who uses pills, if there is anyone who uses pills**
1106 **as a contraception, please raise your hand.**

1107

1108 [No participants raised their hands]

1109

1110 **F: There is none?**

1111

1112 No. [All participants responded at once]

1113

1114 **F: Okay, we will move forward. May everyone who is using an injection raise their hands.**

1115

1116 [Participants raised their hands]

1117

1118 **F: So, those using an injection, we have number 2, number 3, number 4, number 5 and number**
1119 **6. Please can number 2 go and place there [Facilitator referring to the body charts] her stickers**
1120 **where you can feel pain. It can be menstrual cramps or another type of pain that you experience**
1121 **if you are on menstrual periods because of using an injection.**

1122

1123 [Movements of participant going to place the stickers]

1124

1125 **F: Thank you, number 2.**

1126

1127 [Movements of participant going to place the stickers]

1128

1129 **F: Number 3, thank you, number 3.**

1130

1131 [Movements of participant going to place the stickers]

1132

1133 **F: Number 4.**

1134

1135 [Movements of participant going to place the stickers]

1136

1137 **F: Okay, thank you so much, number 4. Number 5. You are allowed to insert your stickers if**
1138 **there is pain that you can feel at the back. You can also insert stickers at the back. Number 6.**

1139

1140 [Movements of participant going to place the stickers]

1141

1142 **F: Thank you so much. Is there anyone who has used an implant or is using an implant.**

1143

1144 [Participant raised her hand]

1145

1146 **F: Yes, number 1.**

1147

1148 [Movements of participant going to place the stickers]

1149

1150 **F: Okay. Thank you so much. Has anyone used an IUD?**

1151

1152 [Slight silence from the participant, no response was an indication that no one has used the contraception
1153 method]

1154

1155 **F: Alright. Thank you so much. Please may we take a sticker that is gold, that is a star. Please**
1156 **may take the sticker and put it anywhere on the body, in the one place on the body where the pain**
1157 **or menstrual cramping bothers you the most. So, right now we were able to put the stickers where**
1158 **we feel any type of pain if we are on menstrual periods because of using a contraception. Please**

CIMC 104 English 14 February 2025

Final Version 1.0

Page 22 of 40

1159 may we now take a sticker that is gold and put it where we feel pain the most, one place where
1160 the pain bothers you the most. We can all stand.

1161

1162 [Movements of participants going to place the stickers]

1163

1164 **F: Okay, thank you so much. Okay, here I can see that we have stickers that are green and blue.**
1165 **So, please explain to me – let’s start here at the top. The place where you have placed the stickers**
1166 **that you have placed, including the gold ones, what do you call this area. If we were to explain**
1167 **this area, what do we call it?**

1168

1169 [Participant raised her hand]

1170

1171 **F: Yes, number 6.**

1172

1173 P6: I say it is **ikhanda** [Meaning: It is a Zulu word, directly translated as a head].

1174

1175 **F: It is **ikhanda** [Meaning: It is a Zulu word, directly translated as a head]. Okay, thank you.**
1176 **What do we call this part on the body?**

1177

1178 [Participant raised her hand]

1179

1180 **F: Yes, number 3.**

1181

1182 P3: They are nipples [participant is speaking softly].

1183

1184 **F: Please raise your voice, number 3.**

1185

1186 P3: They are **amabele** [Meaning: It is a Zulu word, directly translated as breasts].

1187

1188 **F: They are **amabele**, [Meaning: It is a Zulu word, directly translated as a breasts] okay. So, is it**
1189 **also breasts here?**

1190

1191 P3: It is a nipple [participant speaking softly].

1192

1193 **F: Is it a nipple?**

1194

1195 P3: Yes.

1196

1197 **F: Okay, so here at the lower part of the breast it is called a nipple. And then the other part is**
1198 **called a breast. Okay, then bellow the breasts, what do you call this area on the body?**

1199

1200 P3: It is **isisu** [Meaning: It is a Zulu word, directly translated as a stomach].

1201

1202 **F: It is **isisu** [Meaning: It is a Zulu word, directly translated as a stomach]. This area is called a**
1203 **stomach.**

1204

1205 P3: Yes.

1206

1207 **F: Alright. Okay and then this place, what do you call it on the body?**

1208

1209 [Participant raised her hand]

1210

1211 **F: Yes, number 5.**

1212

1213 P5: It is **isinye** [Meaning: It is a Zulu word, directly translated as a bladder].
1214
1215 **F: It is **isinye** [Meaning: It is a Zulu word, directly translated as a bladder]. Alright, okay and**
1216 **then when we look at the back, what do we call this area?**
1217
1218 [Participant raised her hand]
1219
1220 **F: Yes, number 1.**
1221
1222 P1: It is **iqolo** [Meaning: It is a Zulu word, directly translated as the lower back].
1223
1224 **F: And then what do we call this area?**
1225
1226 P3: I think it is the spinal cord.
1227
1228 **F: Spinal cord, do we agree with number 3?**
1229
1230 [Participant raised her hand]
1231
1232 F: Yes, number 1.
1233 P1: I think it is still **iqolo** [Meaning: It is a Zulu word, directly translated as the lower back] here above
1234 the buttocks.
1235
1236 **F: Oh, it is still **iqolo** [Meaning: It is a Zulu word, directly translated as the lower back] also**
1237 **there?**
1238
1239 P1: Yes
1240
1241 **F: Oh, all this area here at the back is **iqolo** [Meaning: It is a Zulu word, directly translated as the**
1242 **lower back]?**
1243
1244 P1: Yes.
1245
1246 **F: Do we all agree with number 1? To the ones who put stickers here at the back?**
1247
1248 Yes! [Participants agreed]
1249
1250 **F: Alright, thank you so much. Which words would you use to explain menstrual cramps?**
1251
1252 [Participants raised their hands]
1253
1254 **F: Yes number 4 and number 1.**
1255
1256 P4: **Islumo** [Meaning: It is a Zulu word, directly translated as menstrual cramps].
1257
1258 **F: **Islumo** [Meaning: It is a Zulu word, directly translated as menstrual cramps].**
1259
1260 P4: Mhm [Yes].
1261
1262 **F: Okay, is there another word?**
1263
1264 P1: I also know that it is **islumo** [Meaning: It is a Zulu word, directly translated as menstrual cramps].
1265

1266 **F: You also know of *islumo* [Meaning: It is a Zulu word, directly translated as menstrual cramps],**
1267 **okay. Please can those who placed their stickers to explain menstrual cramps to share their**
1268 **experiences with their menstrual cramps.**

1269
1270 [Participant raised her hand]

1271
1272 **F: Yes, number 4.**

1273
1274 P4: The [menstrual] cramps that I have are [menstrual] cramps before I go on [menstrual] periods. They
1275 are [menstrual] cramps here on left and right.

1276
1277 **F: Okay...**

1278
1279 P4: Yes...

1280
1281 **F: Okay and how is it when you have them?**

1282
1283 P4: It's like there is something like there are balls on both sides, you see. It wants to come out and it is
1284 forcing. That's how it is.

1285
1286 **F: Okay, is there anyone else who would like to share?**

1287
1288 [Participant raised her hand]

1289
1290 **F: Yes, number 1.**

1291
1292 P1: I don't know if I can call it *islumo* [Meaning: It is a Zulu word, directly translated as menstrual
1293 cramps] because it is not like *islumo* [Meaning: It is a Zulu word, directly translated as menstrual
1294 cramps], it is different now. I am used to it.

1295
1296 **F: Okay.**

1297
1298 P1: It is the pains that number 4 mentioned, here on the side but I can feel when I bend it feels like I
1299 can always bend like this. But I can feel when there is something touching me, when I touch myself
1300 here, I can feel them [menstrual cramps] same time. But if I am sleeping, I don't feel pain like when I
1301 feel *islumo* [Meaning: It is a Zulu word, directly translated as menstrual cramps].

1302
1303 **F: Mhm [Neutral]. Okay, thank you. So, we have placed our stars here, why do we say this is the**
1304 **area on our body that is most bothersome, what happens here?**

1305
1306 [Participant raised her hand]

1307
1308 **F: Yes, number 4.**

1309
1310 P4: I think that since the eggs are there, so all the process is done there. That's why the pain is there.

1311
1312 **F: Oh okay...**

1313
1314 P4: Mhm [Neutral].

1315
1316 **F: Oh okay, what happens to you that makes you say that it is the most bothersome area then the**
1317 **other areas on your body?**

1318

1319 P4: Like I have mentioned, there are two balls, left and right. It is like they are pushing; it is like they
1320 want to come out of the meat [muscle], you see.

1321

1322 **F: Okay, thank you so much, number 4. Is there anyone else that would like to share?**

1323

1324 [Slight silence by participants]

1325

1326 **F: Alright, here I can see a star by the head. Why do we say it is the most bothersome spot. To**
1327 **the one who placed the star on the head, what happens?**

1328

1329 P2: The headache is the most bothersome.

1330

1331 **F: Mhm [Neutral].**

1332

1333 P2: I even go to the clinic, the way it is bothersome.

1334

1335 **F: The headache bothers you when you have started or when we have not started your [menstrual]**
1336 **periods.**

1337

1338 P2: When I have not started.

1339

1340 **F: Oh okay. And then here there are stars, here at the back of the body. What happens where you**
1341 **say it is most bothersome.**

1342

1343 [Participant raised her hand]

1344

1345 **F: Yes, number 5.**

1346

1347 P5: The reason I said it is the place that is most bothersome, even though it doesn't relate that much to
1348 [menstrual] periods, but I once had a c section, so, every day I am complaining about the lower back,
1349 everything including the spinal cord. So, that is why I have placed a star.

1350

1351 **F: Okay, and what do you do to help yourself when you have those pains?**

1352

1353 P5: I would be lying; I haven't used anything. Besides sleeping on my stomach only.

1354

1355 **F: Oh, that also helps you.**

1356

1357 P5: It becomes better, it becomes better. And sitting down makes it better.

1358

1359 **F: Okay, when number 2 has a headache, what helps her?**

1360

1361 P2: I drink pills.

1362

1363 **F: Which pills do you drink?**

1364

1365 P2: I drink **Brufen**. I usually have **Brufen** and **Panado**.

1366

1367 **F: Okay, what do others use when they are experiencing pain? Here at the front [of the poster], I**
1368 **can see you have placed stars underneath. What do you use?**

1369

1370 [Participants raised their hands]

1371

1372 **F: Yes, number 1 and number 4.**

1373
1374 P1: What helps me with pains, even if it is anywhere, it is **Brufen**. It is the one that works best for me?
1375
1376 **F: What is **brufen**? Is it also pills?**
1377
1378 P1: Yes, it is pink pills.
1379
1380 **F: Okay, yes number 4.**
1381
1382 P4: I have period pains underneath [on the poster], what I use is this other cream. It is called period pain
1383 cream. So, I apply it on my bladder. It is like it has mint; it is the one that works for me.
1384
1385 **F: Okay, number 6.**
1386
1387 P6: If I have pains on the bladder, I usually place warm water.
1388
1389 **F: Okay...**
1390
1391 P6: That helps me to decrease the pain on the bladder.
1392
1393 **F: Alright, okay. Thank you so much. I would like to know if there are any of you who ever since**
1394 **they used a contraception, they have less menstrual pain?**
1395
1396 [Participant raised her hand]
1397
1398 **F: Yes, number 2.**
1399
1400 P2: They are less, there aren't many pains since I use an injection.
1401
1402 [Participant raised her hand]
1403
1404 **F: Okay... Yes, number 4.**
1405
1406 P4: I can also say it is not the same as before. Before, I would go on periods, I would have painful
1407 period pains and had to sleep. When I started the injection, I have period pains before [menstrual
1408 periods] and they are less. And they are bearable.
1409
1410 **F: Alright, thank you. Thank you so much for doing this activity well. We will continue with our**
1411 **discussion. For the next few questions, let us look back at all the ways contraception has changed**
1412 **your menstrual cycles. So, we have done the body mapping, we did our charts, we spoke about**
1413 **how often we bleed, we spoke about the changes that we experienced, we spoke about menstrual**
1414 **cramps, we spoke about how the changes have made the body feel and how the changes have**
1415 **impacted your daily life. We have looked at all those things. We looked at what impact these**
1416 **things have even in our lives. All the ways that we have been affected, we have spoken about it**
1417 **now. So, I would like for us, when continuing with our discussion, talk about what information**
1418 **did you get from the clinic or healthcare provider about changes to your menstrual cycle before**
1419 **you started the method you are using now?**
1420
1421 [Slight silence by participants]
1422
1423 **F: Is there any information that you gained?**
1424
1425 [Participant raised her hand]
1426

1427 **F: Yes, number 1.**

1428

1429 P1: If I remember correctly, it was long time. It is from last year. The nurse had told me that there will
1430 changes for my [menstrual] periods. And that there will be changes on my body. The implant I am using
1431 causes weight loss for others, for others it makes them gain. So, that is the information I was told.

1432

1433 **F: Would you say that the information that she gave you helped you?**

1434

1435 P1: It helped me, because the things that she mentioned are things that are taking place, but I didn't
1436 expect them to happen the way they occurred.

1437

1438 **F: Oh okay. Maybe would you like to share?**

1439

1440 P1: Yes, it is too much. I thought that maybe when she said my [menstrual] periods will change, I
1441 thought that she is maybe talk about the fact that days won't be the same. Maybe if I go on menstrual
1442 periods on the 15th, maybe it will happen that I go on menstrual periods on the 30th and so forth. But
1443 that is not what is happening. I can say that it is the scale, they come more often and more days.

1444

1445 **F: Mhm [Neutral], okay. So, the information that you received, would you say you have**
1446 **experienced it?**

1447

1448 P1: Yes.

1449

1450 **F: Okay. Thank you, is there anyone else that would like to share?**

1451

1452 [Slight silence by participants]

1453

1454 **F: Okay. Now, I would like for us to think about all the things we have talked about today. What**
1455 **do you wish they had told you more about the changes to your menstrual cycle before you started**
1456 **to use the contraception method.**

1457

1458 [Participant raised their hands]

1459

1460 **F: Yes, number 3, 5 and 4.**

1461

1462 P3: I wish they had told me that since I will be taking this injection it will happen that I don't go on
1463 menstrual periods at all.

1464

1465 **F: Mhm [Neutral].**

1466

1467 P3: Yes.

1468

1469 **F: Okay.**

1470

1471 P3: Yeah, that is what I wish they had informed me about. They told me about the advantage, that if I
1472 take an injection, I won't fall pregnant. It will prevent me from falling pregnant. But the disadvantage,
1473 they didn't tell me that I will gain weight and not go on [menstrual] periods at all.

1474

1475 **F: Okay...**

1476

1477 P3: Yeah.

1478

1479 **F: Maybe if they had told you, how would it have helped you?**

1480

1481 P3: Maybe it would have helped me to choose maybe another method.
1482
1483 **F: Mhm [Neutral].**
1484
1485 P3: Because I get injected with a depo [Meaning: It is an injection, DMPA contraception]. Isn't there
1486 is also an implant. There is also the one for 2 months, I don't know it's [participant referring to the
1487 injection] name, the loop and so forth. Maybe I could have chosen from other methods.
1488
1489 **F: Okay...**
1490
1491 P3: Maybe if they had explained to me before.
1492
1493 **F: Thank you, number 3. Number 5, and number 1 I have noted you.**
1494
1495 P5: I wish they told me step by step that these are the disadvantages that will happen. It is possible to
1496 gain and possible to lose weight. There are a lot of changes that you should expect. It might happen that
1497 you don't go on your [menstrual] periods at all. It might happen that you go on menstrual periods for
1498 many days then what you initially did. And if they had given me the choice to explain about everything,
1499 then I would have had a choice to choose whether I continue with taking a depo, you see.
1500
1501 **F: Mhm [Neutral].**
1502
1503 P5: Yeah.
1504
1505 **F: Okay, what information would have made your experience with the contraceptive method**
1506 **better?**
1507
1508 P5: I would say, they could have explained more about the [menstrual] periods, that you will go on
1509 them [menstrual periods] more or less. If they had explained that part, that it will happen you go on
1510 menstrual periods less or more. That's the part.
1511
1512 **F: Mhm [Neutral].**
1513
1514 P5: Yeah.
1515
1516 **F: How would have that made your experience better?**
1517
1518 P5: It would have been better because I would have known what to expect.
1519
1520 **F: Alright, thank you so much, number 5. Number 4.**
1521
1522 P4: I wish they had explained to me that my [menstrual] periods will increase, because I am used to 3
1523 days. Now they have increased to 6 days. If they had explained before, I would have been mentally
1524 prepared that at least my [menstrual periods] days are going to increase.
1525
1526 **F: Okay, and how would have that information made your experience better with the**
1527 **contraceptive method?**
1528
1529 P4: I would have been mentally prepared that now I am going to go on menstrual periods for 6 days. I
1530 wouldn't have gotten surprises. Now I am learning that oh this what the injection does. They didn't
1531 explain to me. So, I am the one who learnt by herself that the injection makes me go on menstrual
1532 periods for 6 days.
1533
1534 [Participant raised her hand]

1585
1586
1587
1588

F: Alright, number 1.

P1: I wish that they had told me that since I am taking an implant, I won't be able to take it out anytime even if it is making me ill. Because I have been to the clinic 3 times, to explain that it is making me ill. I would say it is making me ill, because of the way things are happening. I would say that. If they had informed me that you can't take it out anytime, they will first treat me 3 times and then take it out from there because it is the same now. I treat it but still, it is continuing, what they treated me for. So, if maybe they had told me that you can't take it out if the 3 years is not complete, maybe I would have chosen another method.

F: Okay. Thank you so much for sharing. What is the most important information you would want a friend to know about these changes before starting contraception?

[Participants raised their hands]

F: Yes, number 3. Number 4, I have noted you.

P3: It is that – for instance - to the ones that bleed heavily, they must explain to them that there will be changes. They will bleed heavily or light. To the ones that bleed heavily, they must be aware that they must buy [sanitary] pads, maybe they must be a bit more. For the one that said she used to go on menstrual periods 3 days, maybe she used to buy 1 pack of pads and then now she goes on menstrual periods more days, she now must buy a lot more sanitary pad.

F: Thank you, number 3. Number 4.

P4: What I would warn her about is that they will go on [menstrual periods] for more days or less or not go on [menstrual periods] at all.

F: Okay...

P4: Secondly, it is that it will affect your energy and your weight.

F: Okay... Why do you think that's the most important information? How will it help her?

P4: It is the one for [menstrual] periods. That her [menstrual] periods will either increase or decrease. It will help her to remain prepared that there are changes that will happen with her [menstrual] periods. She mustn't panic and think she is sick.

F: Mhm [Neutral].

P4: Yes.

F: Okay, thank you so much, number 4. Thank so much guys for your responses. Our discussion is going very well. Are we still good though?

Yes! [All participants responded once]

F: Okay, we will continue with our discussion. Please may we all stand up.

[Movements of participants standing up]

F: We are now doing our last activity. We will talk about two questions healthcare providers or researchers sometimes ask people about their menstrual cycle. I will ask you each a question, and

CIMC 104 English 14 February 2025

Final Version 1.0

Page 30 of 40

1589 we will take a few minutes. So, our first question says, when you last had a period, would you
1590 describe it as: light, moderate, or heavy. On your last period, would you describe your period as
1591 light, moderate or heavy. Those who say their periods were light, please raise your hand. Please
1592 may we go this side number 5 and number 1.

1593
1594 [Movements of participants moving to one side]

1595
1596 **F: Those who say their periods were moderate, please raise your hands.**

1597
1598 [No participants raised their hands]

1599
1600 **F: Okay. Those who say their periods were heavy, please raise your hands. Number 2, number 3**
1601 **and number 4, please can we stand this side.**

1602
1603 [Movements of participants moving to one side]

1604
1605 **F: Alright. Okay, we will start with our group, light. Please tell me how did you decide that your**
1606 **last period was light?**

1607
1608 [Participant raised her hand]

1609
1610 **F: Yes, number 5.**

1611
1612 P5: Mine were light because I was not using the entire pack. I was using pantyliners and they were not
1613 getting full. So, yeah, they were not that bad.

1614
1615 **F: Okay, when you say, it was not getting full, what was not getting full?**

1616
1617 P5: The pantyliner [the participant was speaking softly].

1618
1619 **F: Pardon.**

1620
1621 P5: The pantyliner was not getting full [of menstrual blood]. So, I wasn't using pads this time. I was
1622 using pantyliners. The pantyliner was not getting full.

1623
1624 **F: Of blood...**

1625
1626 P5: Yes.

1627
1628 **F: Oh, alright. Thank you, number 5. I noticed that number 1 moved from the group, light. She**
1629 **is now in the group of the heavy.**

1630
1631 P5: Uhm, I didn't hear the question properly, I thought you were asking if they were light before. But I
1632 heard that you said the last period. So, heavy ones, I am currently on them. I must insert a tampon and
1633 a pad so that I can go on with the day and stay for that time until I am in a place that I can change.
1634 So, they are heavy. They have clots.

1635
1636 **F: Thank you so much, number 1. Please explain to me number 5 from the light group, how long**
1637 **ago was the period you were thinking about when you answered the question? If it was last month**
1638 **or 2 months ago, please may we raise our hands.**

1639
1640 [Participant number 5 raised her hand]

1641
1642 **F: Number 5.**

1643
1644 P5: They were last month.
1645
1646 **F: Oh, it was last month.**
1647
1648 P5: Yes.
1649
1650 **F: Okay, thank you. If it was three months to six months ago? Please may we raise our hands.**
1651
1652 [Participant 2 raised her hand]
1653
1654 **F: I can see number 2 raised her hand. If it was more than six months ago. Please may we raise**
1655 **our hands.**
1656
1657 [Participant number 3 raised her hand]
1658
1659 **F: I can see number 3, raised her hands. Okay, number 4 and number 1 didn't raise their hands.**
1660 **Why?**
1661
1662 P4: I didn't hear the question, uhm.
1663
1664 **F: The question is, the decision that you took, that your last period was heavy//**
1665
1666 P4: //Yes//
1667
1668 **F: //When was your last period?**
1669
1670 P4: Last week.
1671
1672 **F: Last week.**
1673
1674 P4: Yes.
1675
1676 **F: Okay, number 1.**
1677
1678 P1: This week, I am still on my periods. Which means it is something current.
1679
1680 **F: Alright, thank you so much guys. Was there anything about this first question that made it**
1681 **difficult to answer?**
1682
1683 P2: Yes.
1684
1685 **F: What was hard?**
1686
1687 P2: We are confused that are talking about before we started the injection or when we have started. That
1688 is where there was a misunderstanding.
1689
1690 **F: Oh okay. The question, as I had mentioned before, it is talking about, since you are using your**
1691 **contraceptive method currently. Okay, on your last period, was it light, medium or heavy? We**
1692 **then moved on and asked when your last period was. Okay, thank you so much, number 2. We**
1693 **are now moving on to the next question. On the heaviest day, we have number 5 who is in the light**
1694 **group and then we have the rest of you guys in the heavy group. On the heaviest day, we are**
1695 **talking about 1 day, on the heaviest day of your last period, using the contraception that you are**

1696 **using, how many menstrual pads, tampons, or any materials did you use? We will start with the**
1697 **light group.**

1698
1699 P5: If I remember correctly, I changed the pad 4 times because it leaked when sleeping and ended up
1700 getting dirty.

1701
1702 **F: So, on that day//**

1703
1704 P5: //On that day//

1705
1706 **F: //Were your periods the heaviest?**

1707
1708 P5: Mhm [Yes].

1709
1710 **F: You changed your [sanitary] pads 4 times.**

1711
1712 P5: Mhm [Yes].

1713
1714 **F: Alright. Thank you so much, let's come to our group that is heavy.**

1715
1716 [Participant raised her hand]

1717
1718 **F: Yes, number 1.**

1719
1720 P1: On that day I used a whole pack, because I double them [pads], because I wanted it to be long on
1721 both sides. So, I can say I used a whole pack because they were very heavy.

1722
1723 **F: What was the pack for?**

1724
1725 P1: It was a pack of [sanitary] pads.

1726
1727 **F: Oh, it is a pack of [sanitary] pads.**

1728
1729 P1: [Sanitary] Pads.

1730
1731 **F: How many [sanitary] pads maybe.**

1732
1733 P1: Ten inside.

1734
1735 **F: Alright. Okay, is there anyone else that would like to share?**

1736
1737 [Participant raised her hand]

1738
1739 **F: Number 2.**

1740
1741 P2: I use heavy flow [Meaning: Participant means the type of sanitary pads that she uses is heavy flow
1742 pads] for pads. So, I usually use 3 in a day.

1743
1744 **F: So, on your last period, where you were bleeding the heaviest. How many did you use?**

1745
1746 P2: I used 4, because I used 2 in the afternoon, because it is the long ones, the heavy flow [sanitary]
1747 pads. So, I used 2 in the afternoon and 2 in the evening.

1748
1749 [Participant raised her hand]

1750
1751 **F: Alright. Number 3.**
1752
1753 P3: I think, uhm, how many were they. They were 6, because even blood clots came out.
1754
1755 **F: They were 6.**
1756
1757 P6: Yes.
1758
1759 **F: What were you using?**
1760
1761 P6: Pads, **Always** [Meaning: Always is the brand of sanitary pads].
1762
1763 **F: Oh okay. So, on that specific day, where they were the heaviest, you used 6 [sanitary] pads.**
1764
1765 P6: Yes.
1766
1767 **F: Okay. Number 4.**
1768
1769 P4: I buy 8 inside. So, I used all 8 of them, because I double them. I insert 2 in the evening.
1770
1771 **F: Alright.**
1772
1773 P4: Mhm [Yes].
1774
1775 **F: Alright, thank you so much. We can come back and sit down.**
1776
1777 [Movements of participants moving to sit down]
1778
1779 **F: So, we noticed that there was difference, uhm unfortunately in the other group, the light group**
1780 **there was only one person. But in the other group, the group that included people who are heavy,**
1781 **there was a difference with the number of the materials that you use when you are on your**
1782 **[menstrual] periods. What do you think caused that?**
1783
1784 [Participants raised their hands]
1785
1786 **F: Yes, number 3 and number 5.**
1787
1788 P3: When we bleed, we don't bleed the same way.
1789
1790 **F: Okay...**
1791
1792 P3: I think it is that.
1793
1794 **F: Oh okay...Alright, number 5.**
1795
1796 P5: I think our bodies are not the same and the way they will react is not the same.
1797
1798 **F: Mhm [Neutral].**
1799
1800 P5: Yeah.
1801
1802 **F: Okay, thank you so much. Is there anything that you found difficult about the second question?**
1803

1804 No [Participants response, participants sounded exhausted]
1805
1806 **F: Okay. How do you think someone would have answered this question if they used something**
1807 **other than [sanitary] pads? The question that I asked you, how would they have answered it.**
1808
1809 [Participants raised their hands]
1810
1811 **F: Yes, number 1 and number 4.**
1812
1813 P4: The ones that are using tampons//
1814
1815 **F: //Number 1//**
1816
1817 P4: //Oh, sorry [Chuckles].
1818
1819 P1: I am a person who uses tampons, so I can say that I can answer that question because I ended up –
1820 if maybe it was another person who doesn't used pads, who uses maybe tampons, my goodness they
1821 [tampons] they don't work! They didn't work for me during that time, on the day when I had heavy
1822 periods. They didn't work for me; it was like I didn't insert anything. There was a leakage a lot. So, that
1823 is why I ended up using [sanitary] pads or maybe if I am going to town, I insert both of it. I insert a
1824 tampon and insert a pad, because it [tampon] was not working.
1825
1826 **F: Okay. Let's say it is not tampons, let's say maybe it is a toilet paper or menstrual cup, do you**
1827 **think she would have been able to answer this question? She would have been comfortable?**
1828
1829 P1: I don't think she would have been able to answer the question.
1830
1831 **F: Why?**
1832
1833 P1: Because maybe if she was responding to someone that she is used to, or maybe that she lives with
1834 and knows her situation and why she inserted a tissue. Because a tissue, I don't think it is something
1835 right to use when on periods. So, I don't think it would have been easy to answer that question.
1836
1837 **F: Okay, please may I come to you number 4, number 2 I have noted you. How do you think**
1838 **someone would have answered this question if they often do not have enough pads, tampons, or**
1839 **other materials? How do you think she would have answered this question?**
1840
1841 P4: I think she was not going to be comfortable to answer it.
1842
1843 **F: Mhm [Neutral].**
1844
1845 P4: Because the only thing that we use for periods, it is tampons or pads.
1846
1847 **F: Mhm [Neutral].**
1848
1849 P4: So, the other things like toilet papers and period [menstrual] cups are things that we are not used to
1850 using.
1851
1852 **F: Okay, do you think that if she usually doesn't enough have at all, what would she have done?**
1853
1854 P4: She would have been shy and say that she didn't have.
1855
1856 **F: Okay, thank you so much, number 4.**
1857

1858 P4: Yes.
1859
1860 **F: Yes, number 2.**
1861
1862 P2: I think it would have been hard to come forth about what I use and don't use the usual, that everyone
1863 is using.
1864
1865 **F: What is the usual?**
1866
1867 P2: It is pads, tampons and so forth. The things you buy.
1868
1869 **F: Okay. Alright, thank you so much. So, sometimes women or girls have a very small amount**
1870 **bleeding, and they may not even need to use any menstrual pad. Maybe they might not need to**
1871 **use tampons or pantyliners or other material. What words would you use to describe this very**
1872 **small amount of bleeding?**
1873
1874 P4: Spotting.
1875
1876 **F: Spotting!**
1877
1878 P4: Yes.
1879
1880 **F: Okay. What does the word spotting mean to you?**
1881
1882 P4: I think it is to go on [menstrual] periods with drops [of menstrual blood].
1883
1884 **F: Mhm [Neutral].**
1885
1886 P4: It comes as drops; the pad doesn't become full. It has a small drop of blood.
1887
1888 **F: Mhm [Neutral].**
1889
1890 P4: Mhm [Yes].
1891
1892 **F: Okay, is there anyone else who can describe this very small amount of bleeding? [Slight silence**
1893 **by participants] Is there anyone else that has a different definition for spotting? Do we all know**
1894 **spotting?**
1895
1896 Yes [Participants speaking softly]
1897
1898 **F: Pardon.**
1899
1900 Yes! [All participants responded at once]
1901
1902 **F: Okay, we all agree with number 4's description?**
1903
1904 Yes [Participants responded softly and seem exhausted]
1905
1906 P1: I agree with her.
1907
1908 **F: Okay. How do you know if it is this type of bleeding, number 3? How do you know if it is**
1909 **spotting?**
1910
1911 P3: I think you can see; your [menstrual] pad. It is not the same [participant is speaking softly].

1912
1913 **F: Please raise your voice.**
1914
1915 P3: You can see on your [menstrual] pad that there are spots.
1916
1917 **F: Mhm [Neutral].**
1918
1919 P3: There isn't a lot of blood or full of blood on the pad.
1920
1921 **F: Okay...**
1922
1923 P3: Yeah.
1924
1925 **F: Okay. Is there anyone else that would like to share how you know if you are spotting?**
1926
1927 P5: What I have experienced is that when I spot sometimes the blood comes out, but it doesn't get to
1928 the pantyliner if I inserted it. When you go to urinate, when you are standing up, you see it [menstrual
1929 blood].
1930
1931 **F: Mhm [Neutral].**
1932
1933 P5: Yeah, that is how I would explain it.
1934
1935 **F: Oh okay. You don't need a pantyliner?**
1936
1937 P5: You need it but sometimes it happens that it [blood] ends up not coming. You find that it [blood]
1938 was not a lot to such an extent that comes on the pantyliner. When you go to urinate, because we like
1939 wiping [the vagina], and then you see blood.
1940
1941 **F: Mhm [Neutral].**
1942
1943 P5: Yeah.
1944
1945 **F: Oh okay...How do you choose whether you use a pad or a tampon with this type of bleeding,**
1946 **when spotting.**
1947
1948 P5: When spotting?
1949
1950 **F: Mhm [Yes].**
1951
1952 P5: I usually see when – I started by inserting a pantyliner and see that how I much I will bleed. If the
1953 pantyliner gets full, it is an indication that I must at least insert a pad because more blood is still going
1954 to come out.
1955
1956 **F: Okay...Is there anyone else that would like to share?**
1957
1958 [Slight silence by participants, participants are exhausted]
1959
1960 **F: Okay, when you have this very small amount of bleeding, since we are talking about spotting,**
1961 **how would you have answered the second question that we discussed? The second question says,**
1962 **on your last period, how many materials did you use on your heaviest day of your last period. Do**
1963 **you remember that we spoke about that?**
1964
1965 Yes! [All participants responded at once]

1966
1967 **F: So, if you were spotting, how would you have answered this question?**
1968
1969 [Participants raised their hands]
1970
1971 **F: Yes, number 4 and number 1.**
1972
1973 P4: So, how I would have responded is, isn't now I am bleeding a small amount//
1974
1975 **F: //Mhm [Neutral]//**
1976
1977 P4: //I would have said I didn't insert a pad at all.
1978
1979 **F: What did you insert?**
1980
1981 P4: I just wore an underwear.
1982
1983 **F: An underwear.**
1984
1985 P4: Yes.
1986
1987 **F: Oh okay... Okay, number 1.**
1988
1989 P1: I was going to use 1 tampon, because that is what I did. That is how it was.
1990
1991 **F: Mhm [Neutral].**
1992
1993 P1: Maybe you find that I will be in town the whole day. I know that I have inserted a tampon. When I
1994 remove it and see that it is not full. One side has blood, and the other side is still clean. So, if it was
1995 before, that is how it would have happened. Since it is now time for this injection, no.
1996
1997 **F: Thank you so much. Before we end, is there anything else you think we should know about**
1998 **your experiences with your menstrual cycle while taking contraception that we didn't talk about?**
1999 **Is there anything that we haven't spoken about today, that you would like share?**
2000
2001 [Participant raised her hand]
2002
2003 **F: Yes, number 4.**
2004
2005 P4: It didn't happen to me, but I would like to share.
2006
2007 **F: Mhm [Neutral].**
2008
2009 P4: There is someone who didn't go on her [menstrual] periods, she used an injection.
2010
2011 **F: Mhm [Neutral].**
2012
2013 P4: And then one day the blood came out through the mouth.
2014
2015 **F: Okay...**
2016
2017 P4: Yes.
2018
2019 **F: Oh okay...What did she do when the blood came out through the mouth?**

2020
2021 P4: She went to the clinic and the clinic referred her to hospital. They told her to change the injection
2022 that she is using.
2023
2024 **F: Oh okay, which injection was she using?**
2025
2026 P4: I think she was using the 3 months.
2027
2028 [Participant raised her hand]
2029
2030 **F: Okay. Alright, thank you, number 4. Thank you for sharing. Number 5.**
2031
2032 P5: I don't know the name of the 2 months injection, but the 2 months injection has a lot of side effects.
2033 If I remember correctly, if I urinated a drop of blood would come out. That is what I experienced when
2034 I was still studying at college. It would be also painful, even when urinating it would be painful. When
2035 you go to the clinic to explain, they ask you which injection you use and tell them it is the 2 months,
2036 then they will tell that is its side effect. It has side effects that are not right, the 2 months injection. It is
2037 worse than the 3 months one. I even thought it is UTI, if you know the UTI for treating an infection, I
2038 thought it was that. But the 2 months injection has side effects that are not right.
2039
2040 **F: Mhm [Neutral].**
2041
2042 P5: Yeah.
2043
2044 **F: Okay, is there someone that you know that experienced a similar situation as the one mentioned**
2045 **by number.**
2046
2047 P5: Mhm [No].
2048
2049 **F: Oh okay...**
2050
2051 P5: It is the one that is close to a UTI that I experienced personally; they told me it is an injection for 2
2052 months.
2053
2054 **F: Mhm [Neutral].**
2055
2056 P5: Yes.
2057
2058 **F: What is a UTI?**
2059
2060 P5: It is Urinary Tract Infection.
2061
2062 **F: Okay...**
2063
2064 P5: When they describe it, because I also googled it, when they describe it – maybe since we use public
2065 toilets or anywhere//
2066
2067 **F: //Mhm//**
2068
2069 P5: An individual catches bacteria easily. Even if you don't sit on the seat but you catch [bacteria]
2070 easily. The wind on its own if you are not dressed. So, yeah that is how they explained it to me. I am
2071 not sure, but yeah.
2072

2073 **F: Thank you. Thank you so much. Thank you for joining our discussion today. You have been**
2074 **amazing! Thank you so much for sharing your information and thoughts. The information you**
2075 **shared today is going to be very helpful to our study. I will stop the recording now. Today is 14**
2076 **February 2025. The time is 12:40, focus group C104.**
